Request for Advanced Modalities

A Community of Learning
Columbia Basin College
Building Futures for Changing Times

Persons interested in the Computed Tomography (CT), Magnetic Resonance Imaging (MRI), or Mammography advanced modalities can receive experiential certificate training through Columbia Basin College. To qualify for this training the applicant must have a current RTR or ARRT license OR be a current second year Radiologic Technology student in good standing. **Please note:** certificate training is experiential only. Clinical training does not guarantee eligibility for ARRT advanced modality testing.

CT or MRI

CBC determines eligibility into Medical Imaging Advance Modalities clinical training (CT or MRI) **each spring/summer** based upon completion of the following classes:

- Completion of IMAGE 250 Cross-Sectional Anatomy (**fall** quarter) with the required minimum grade of 3.0
- Completion of IMAGE 280 or IMAGE 281 Instrumentation (**winter** quarter) with the required minimum grade of 3.0

If clinical placement is requested and the two prerequisite class requirements have been met, it is mandatory that you submit and pay for your background history and immunization tracker account from the college-approved vendor before February 22 of each year. This is an additional cost for each student.
Placement in a clinical facility **spring** quarter is **competitive** based on accumulative grades and number of positions available in facilities.

Mammography

Students who have a current RTR or ARRT license are eligible for the summer quarter Image 225 Mammography and Image 229 Mammography Clinical upon fulfilling the requirements below. **Please note:** certificate training is experiential only. Clinical training does not guarantee eligibility for ARRT advanced modality testing.

Required Documents

Submit the following documents to the CBC Health Sciences Center in Richland: before August 10 for CT or MTI and by May 1 for Mammography each year in order to be considered;

1. Current drivers license (copy required)
2. Current, valid RTR (or R ARRT) license in good standing (copy required)
3. CBC student ID number (If you are new to CBC, a college application must be processed at CBC Hawk Central before registration is allowed. The deadline to apply for fall quarter is August 8, for summer quarter June 12.)

Registration will be posted by the staff at the CBC Health Sciences Center upon review and approval of the Radiologic Technology Program Coordinator.
