Total Credits Required   64-68

Students who complete this certificate will have the skills and knowledge necessary to create web pages and web sites. This involves developing a design that effectively communicates the ideas being promoted by the customer while ensuring that the design is technically correct, usable, accessible, visually appealing, and works well with search engines. Students will learn how to use HTML/XHTML, CSS, and JavaScript. They will also learn how to use Access, ASP.Net and Photoshop, and Flash. Career opportunities: web developer, web technician, and web and mobile device programming.
