

Wireless Network Configuration for Windows 7

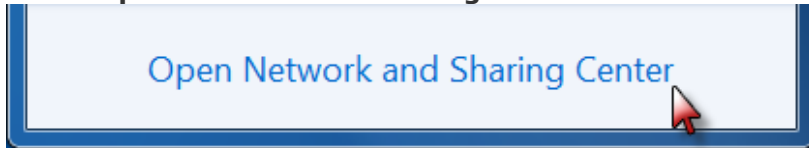

NOTE: Read the numbered steps. Failure to read the steps may cause errors that require users to start over.

Procedure:

1. Click the **network connections icon**

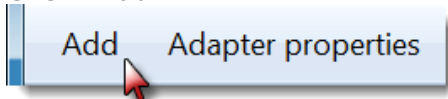

2. Click "Open Network and Sharing Center"

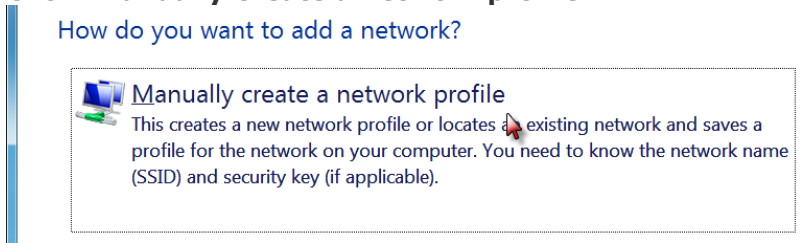

3. Click "Manage wireless networks"

4. Click "Add"

5. Click "Manually Create a network profile"

6. **Type "students"** (all lowercase without quotes) in the "Network name:" field
7. **Select "WPA2-Enterprise"** from the "Security type:" drop-down box
8. **Click Next**

Enter information for the wireless network you want to add

Network name:

Security type:

Encryption type:

Security Key: Hide characters

Start this connection automatically

Connect even if the network is not broadcasting

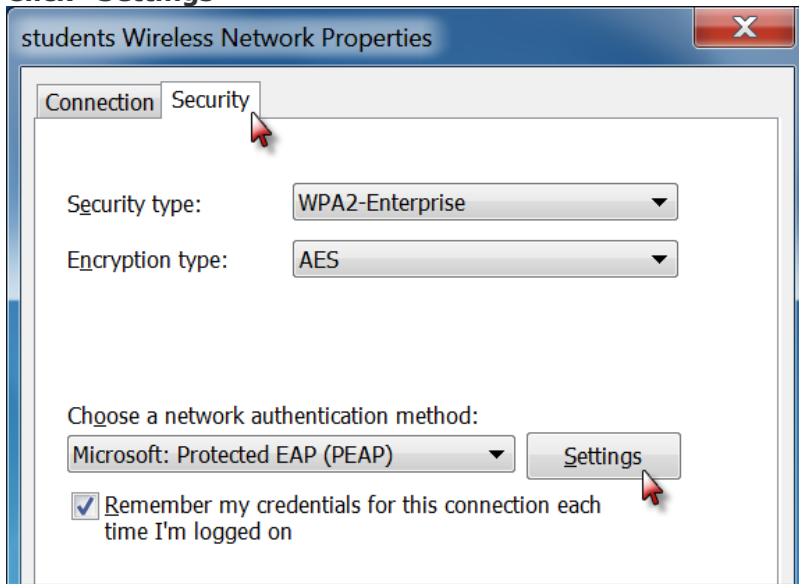

Warning: If you select this option, your computer's privacy might be at risk.

9. **Click "Change connection settings"**

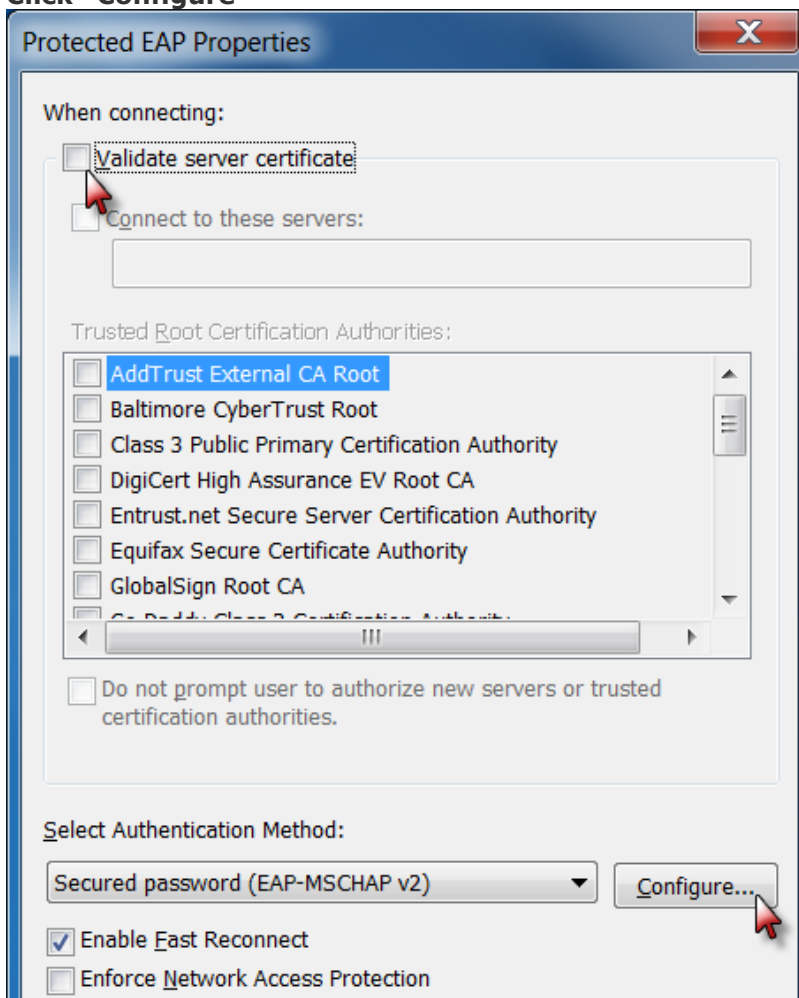

Successfully added students

[→ Change connection settings](#)
Open the connection properties so that I can change the settings.

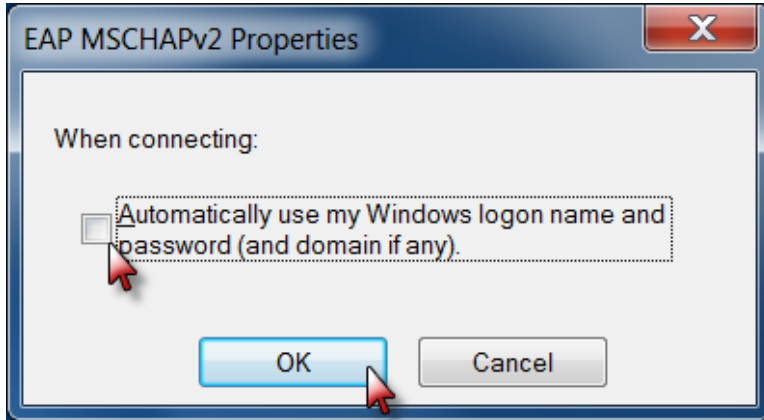

- 10. Click "Security"
- 11. Click "Settings"

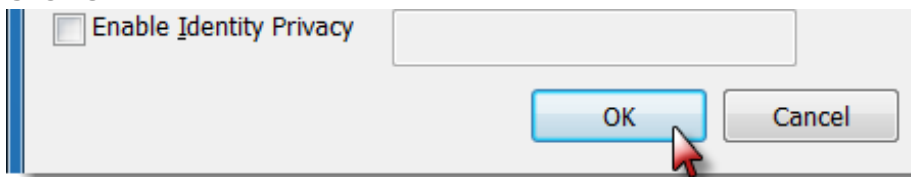

- 12. Un-check "Validate server certificates"
- 13. Click "Configure"

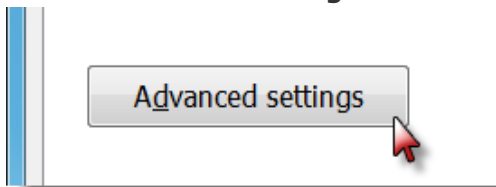

- 14. Un-check "Automatically use my Windows logon name and password (and domain if any)."
- 15. Click OK

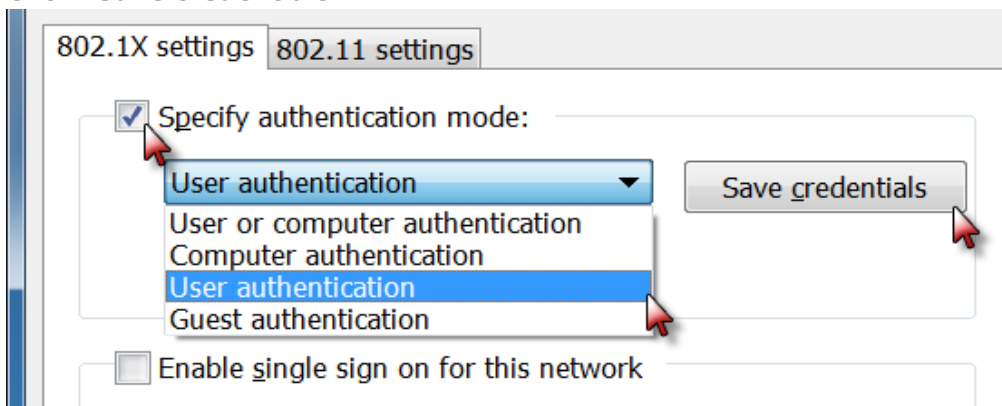

- 16. Click OK

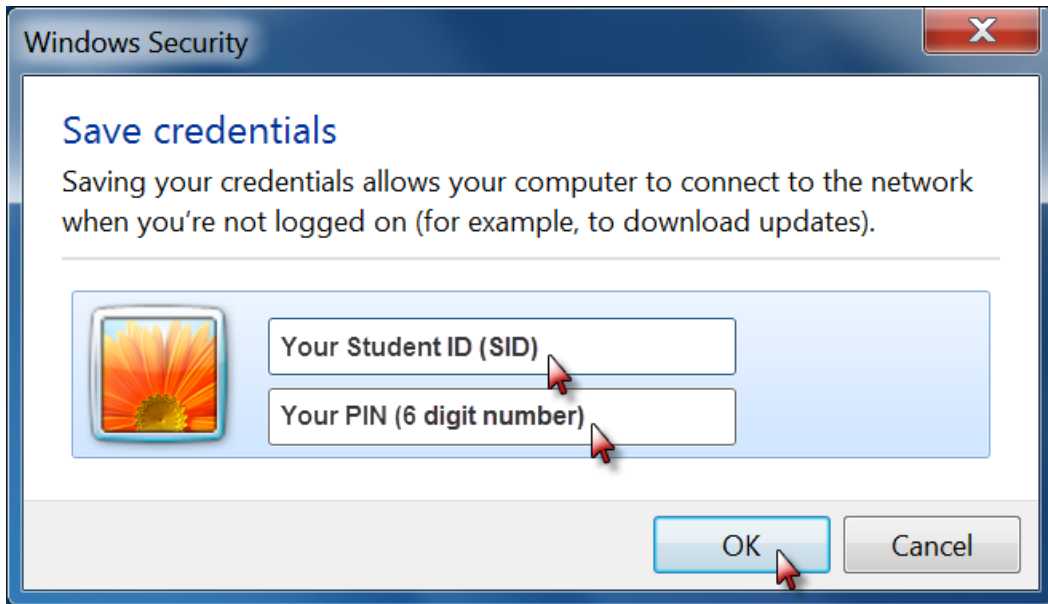

- 17. Click "Advanced settings"

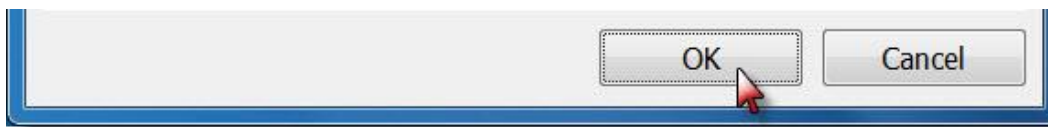

- 18. Check "Specify authentication mode:"
- 19. Select "User authentication" from the drop-down box
- 20. Click "Save credentials"

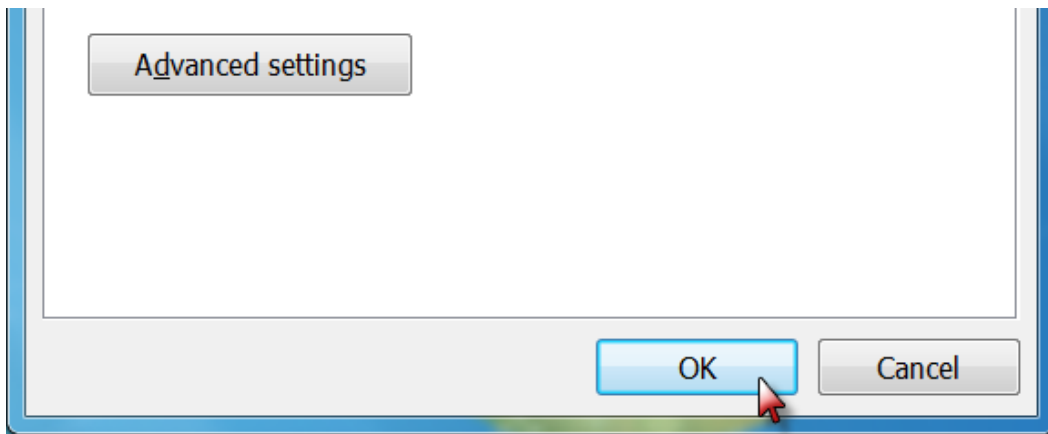

- 21. **Type User Name** (Student ID)
- 22. **Type Password** (PIN, must be a 6 digit number)
- 23. **Click OK**

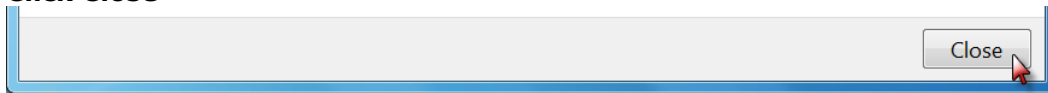

- 24. **Click OK**

- 25. **Click OK**

- 26. **Click Close**

Congratulations! Your device is now configured to use the CBC wireless network.

If you need additional help getting connected, please drop by the Computer Assistance desk in the Library.
