

How to save a PowerPoint 2010 document as an XPS file

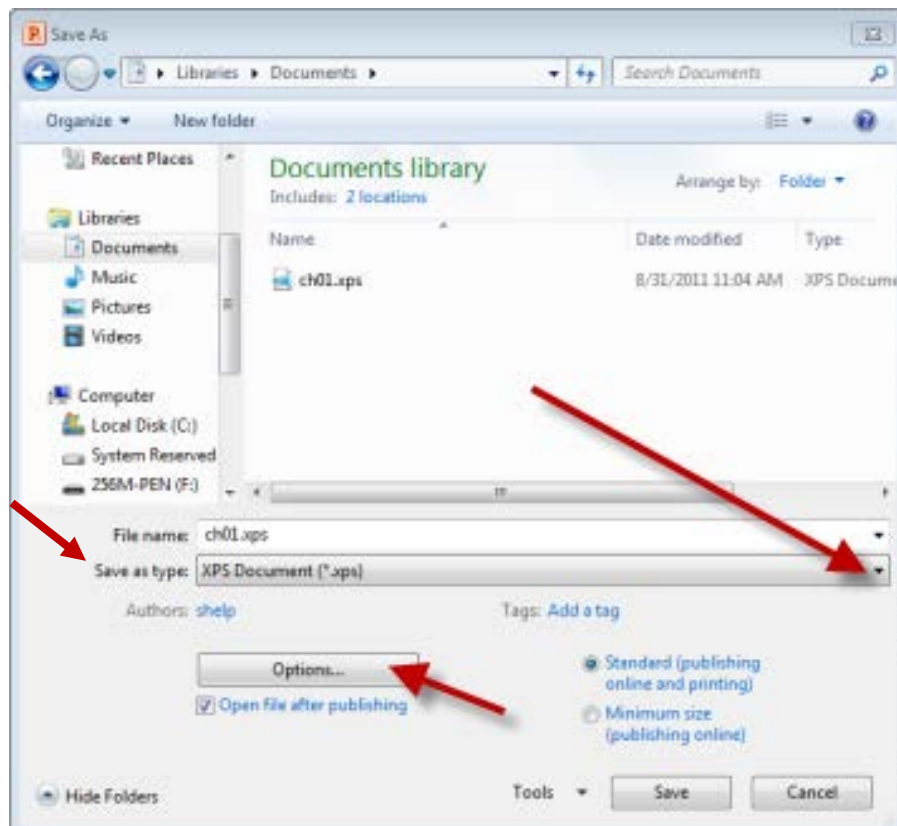

1. While still in your PowerPoint...

2. Click **“Save As”**

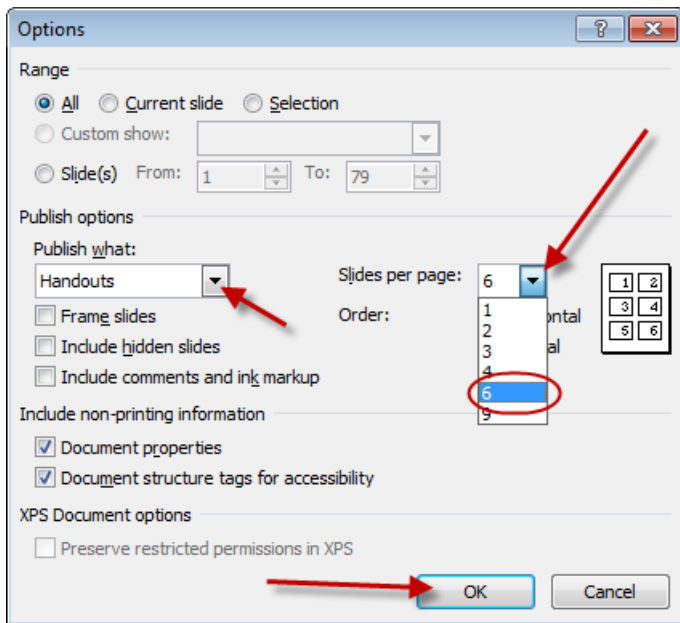

3. Change the **“Save as Type”** to XPS

4. Click **“Options”**

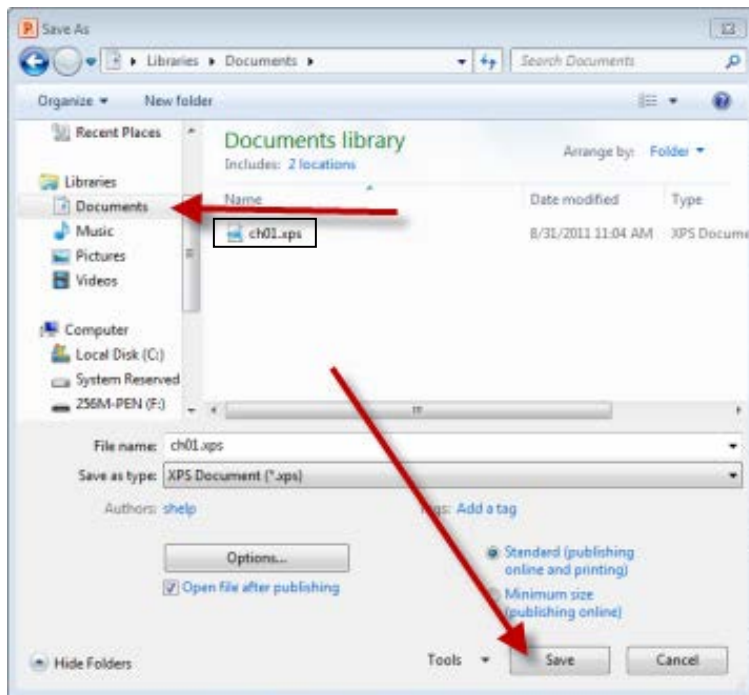

5. Publish what: Select **“Handouts”**
6. Select how many slides you want printed on each side.
7. Click **OK**

8. Click **“Save”**.

*Remember the file name and where you saved it. This one is saved in “Documents” and it is named ch01.

This file is now ready to print with NetPrint.
