ACADEMIC HONESTY

Students and instructors share responsibility in promoting and maintaining an environment that supports academic integrity. Academic dishonesty minimizes the learning process and threatens the learning environment for all students.

As members of the Columbia Basin College learning community, students are not to engage in any form of academic dishonesty which include, but are not limited to: plagiarism, cheating, fabrication and falsification, grade tampering, and misuse of computers and other electronic technology. Students who engage in academic dishonesty can expect some academic penalty to be determined by the instructor. Additionally, as academic dishonesty is a violation of CBC’s student code of conduct, students who engage in academic dishonesty may face disciplinary action to include warning, reprimand, probation, suspension, and dismissal. For more detailed information, please refer to the CBC website @ www.columbiabasin.edu/sserv/honesty.

2005-2006 Catalog Addendum
Class Descriptions

New Class

NRS 222
Professional Issues I .............................. 1
One credit class providing an overview of nursing management and leadership, legal issues in nursing, job search, nursing delivery systems, and role transition issues related to moving from a nursing student to a professional nursing practice. Prerequisites: Concurrent enrollment in NRS 221 and NRS 2211.

New Class

NRS 232
Professional Issues II ............................... 1
One credit class providing an overview of contemporary health care, regulations of Registered Nurse practice, collective bargaining, conflict management, safety in the workplace and boundary issues for professional nurses. Prerequisites: Concurrent enrollment in NRS 231 and NRS 2311.

Credit Change

NRS 2351
Nursing Trends Lab .............................. 1
Credit changed from 2 to 1.
A campus laboratory experience designed to allow the Nursing student time to gain proficiency in Nursing skills before actual practice in the hospital setting. Students enrolled in the Nursing Program register for this class each quarter. Pass/Fail class. Prerequisite: Enrollment in the Nursing Program.

New Class

AMT 120
Basic Electrical & Electronics ..................... 2
This combination class/lab is designed to give the student a basic understanding of the theory, diagnosis and service of automotive electrical and electronic systems. This includes examining and understanding basic electrical principles and how malfunctions affect electrical systems. Service and repair techniques are also covered. Prerequisites: AMT 110 and AMT 1101.

New Class

AMT 1201
Basic Electrical & Electronics Lab ............. 5
Lab to be taken concurrently with AMT 120.

New Class

AMT 123
Brakes/Suspension I .............................. 2
This combination class/lab is designed to give the student a basic understanding of the theory, diagnosis and service of automotive brake, steering, and suspension systems. The emphasis will be on the mechanical portion of those systems. Prerequisites: AMT 120 and AMT 1201.

New Class

AMT 1231
Brakes/Suspension I Lab ..................... 5
Lab to be taken concurrently with AMT 123.

New Class

AMT 130
Engine Performance .............................. 2
This combination class/lab is designed to give the student a basic understanding of the theory, diagnosis and service of automotive engine performance systems. Emphasis will be on basic engine performance related to engine diagnosis, ignition systems, fuel delivery, emission systems and routine maintenance. Prerequisites: AMT 123 and AMT 1231.

New Class

AMT 1301
Engine Performance Lab ..................... 5
Lab to be taken concurrently with AMT 130.

New Class

AMT 133
Engine Repair and Rebuild ........................ 2
This combination class/lab is designed to give the student a basic understanding of the theory, diagnosis and service of internal engines. Students will study the operation of an internal combustion engine with an emphasis on failure analysis. Upon completing an engine rebuild the learner will do hot run engine dynamometer diagnostic tests. Prerequisites: AMT 130 and AMT 1301.

New Class

AMT 1331
Engine Repair and Rebuild Lab ................ 5
Lab to be taken concurrently with AMT 133.
AMT 1402
Automotive Internship .......................  7
This summer internship program is designed to prepare the student
for actual shop employment. Students will be required to spend
a minimum of eight weeks (340 hours) working in an automotive
repair facility gaining experience with genuine automotive shop
working conditions. This “hands-on” practice will enable the stu-
dent to be more prepared for their second year advanced studies
and will allow them to have verifiable “employed” experience when
searching for employment at completion of the second year. The
internship work site must be instructor approved. Prerequisites:
AMT 133 and AMT 1331, ENG 103, and Speech.

AMT 220
Advanced Electrical & Electronics ..........  2
This combination class/lab is designed to give the student a highly
developed understanding of the theory, diagnosis and service of
the advanced automotive electrical and electronic operating sys-
tems. Prerequisite: AMT 1402.

AMT 2201
Advanced Electrical & Electronics Lab ......  5
Lab to be taken concurrently with AMT 220.

AMT 223
Brakes/Suspension II ............................  2
This combination class/lab is designed to give the student a highly
developed understanding of the theory, diagnosis and service of
the advanced steering, suspension, and brake systems, with a heavy
emphasis on the electronic side of those systems. Prerequisites: AMT
220 and AMT 2201.

AMT 2231
Brakes/Suspension II Lab ......................  5
Lab to be taken concurrently with AMT 223.

AMT 230
Automatic Transmission .......................  2
This combination class/lab is designed to give the student a basic
understanding of the theory, diagnosis and service of automotive
automatic transmissions. This includes the complete rebuild of an
automatic transmission and the understanding of the internal hy-
draulic, electrical and mechanical operations. Prerequisites: AMT
223 and AMT 2231.

AMT 2301
Automatic Transmission Lab ..................  4
Lab to be taken concurrently with AMT 230.

AMT 233
Manual Transmission .........................  2
This combination class/lab is designed to give the student a basic
understanding of the theory, diagnosis and service of automotive
manual transmissions. The student will rebuild a manual transmis-
sion and gain knowledge of internal gear transfer paths. In addition,
study of clutches, drive axles, and differentials will round out this
course of study. Prerequisites: AMT 230 and AMT 2301.

AMT 2331
Manual Transmission Lab ....................  5
Lab to be taken concurrently with AMT 233.

AMT 2401
Drivability Diagnostics Lab ..................  5
Lab to be taken concurrently with AMT 240.

AOT 115
Legal Aspects of the Medical Office ........  2
An introduction of the basic American legal system, the physician-
patient relationship, the medical record and its uses; informed con-
sent; licensure, certification and registration; the basic laws protect-
ing patient information including knowledge of HIPAA regulations
and how they pertain to the Medical Assistant. Recommended
prerequisite: Internet proficiency.

AOT 143
Administrative Medical Assistant Office
Procedures ......................................  5
This course will help define the front office roles and responsibilities
of an administrative medical assistant. Major topics covered are a
history of the profession, patient education, performing adminis-
trative office duties including reception, introductory level book-
keeping and billing, and externship requirements materials.

AOT 155
Introduction to Coding .......................  4
Introduction to medical coding concepts, methods, and guidelines
using the International Classification of Diseases 9th Edition (ICD-
9-CM), and Current Procedural Terminology (CPT). Prerequisite:
Medical Terminology 147 with a minimum 2.0.
New Class

AOT 241
Externship Seminar
This course is to be taken concurrently with the externship MA 2413 for medical assistants. The seminar will provide current information regarding workplace issues, technologies, and advancements in health care pertinent to the externship experience. Students will be engaged in discussions based on their experiential learning opportunities within the externship. Prerequisite: successful completion of all other medical assistant courses with a GPA of 2.0 or higher.

New Class

AOT 2411
Externship
This class provides an opportunity to apply the theory learned in the classroom setting to a health care setting through practical, hands-on experience.

Title Change

BIO 105
Cell Biology for Allied Health [M/S]
The structure and function of the cell covering the levels of organic complexity from molecules to tissues. The use of models, microscope slides and physiological experiments illustrate cellular structure and function. Strongly recommend: High school chemistry or CHM 100/CHM 1001 or CHM 101/CHM1011. This course does not satisfy the prerequisite for BIO 112 or BIO 113.

Title Change

BIO 1051
Cell Biology for Allied Health Lab [M/S] Lab to be taken concurrently with BIO 105.

Added Class

BIO 1481
Plant Identification Lab [M/S] Lab to be taken concurrently with BIO 148.

New Class

CHM 2867
Undergraduate Research, Special Topics
Designed for students who want to expand their knowledge of chemistry beyond the basics offered in their regular courses. By arrangement with the instructor, the student can pursue a special topic of interest, design and carry out a project, or participate in undergraduate research (either alone or with other students). Prerequisite: Chemistry 101/1011 with a grade of 2.0 or higher, or high school chemistry with a grade of B or better. Instructor’s permission is also required to enroll. Note: credits earned in this course cannot be used as a substitute for required credits in other CBC chemistry courses.

New Class

CHM 2868
Undergraduate Research, Special Topics
Designed for students who want to expand their knowledge of chemistry beyond the basics offered in their regular courses. By arrangement with the instructor, the student can pursue a special topic of interest, design and carry out a project, or participate in undergraduate research (either alone or with other students). Prerequisite: Chemistry 101/1011 with a grade of 2.0 or higher, or high school chemistry with a grade of B or better. Instructor’s permission is also required to enroll. Note: credits earned in this course cannot be used as a substitute for required credits in other CBC chemistry courses.

New Class

CHM 2869
Undergraduate Research, Special Topics
Designed for students who want to expand their knowledge of chemistry beyond the basics offered in their regular courses. By arrangement with the instructor, the student can pursue a special topic of interest, design and carry out a project, or participate in undergraduate research (either alone or with other students). Prerequisite: Chemistry 101/101.1 with a grade of 2.0 or higher, or high school chemistry with a grade of B or better. Instructor’s permission is also required to enroll. Note: credits earned in this course cannot be used as a substitute for required credits in other CBC chemistry courses.

CS 206
Database Design
An advanced course designed to help students understand concepts including: SQL, integrity constraints, relational database design, normalization, and physical database design. Students also gain hands-on experience using Microsoft Access. Prerequisites: CS 106, MTH 95, and/or instructor’s permission. All prerequisites must be passed with a 2.0 or better before taking this class.

Credit Change

DHYG 113
Clinical Dental Hygiene Techniques I
Introduces basic principles used in the practice of dental hygiene, including infection control, patient assessment and treatment. Prerequisites: Acceptance and enrollment in the CBC Dental Program. Required concurrent enrollment in DHYG 1131.
**DHYG 221**

**Community Oral Health 1** .......................... 2

Examines the principles of community health, including: Assessment indices, planning, implementation, and evaluation of health care, with an emphasis on oral health. Builds on knowledge of ethics, basic and dental sciences, and clinical dental hygiene practice. Provides the knowledge to function in a community oral health setting. Prerequisite: Concurrent enrollment in DHYG 221. Due to the nature of the program curriculum, each quarter builds on the knowledge and skills gained in previous quarters. Continuing enrollment is contingent upon successful completion of quarterly Dental Hygiene Program courses.

**NEW CLASS**

**ENT 274**

**Architectural Residential Drawing** ............... 2

A drafting and design course covering architecture residential drawings and the organization of drawing sets incorporating design projects. Prerequisite: ENT 276.

**NEW CLASS**

**ENT 2741**

**Architectural Residential Drawing Lab** ......... 1

This course is offered to complement the ENT 274 course. Students must be concurrently enrolled in ENT 274.

**NEW CLASS**

**ENT 281**

**Micro Station I for the Autocad User** ............ 2

This course utilizes MicroStation for computer-aided drafting (CAD). The course is designed for the beginning CAD user who wants to transfer existing AutoCAD knowledge to MicroStation skills.

**NEW CLASS**

**ENT 2811**

**Micro Station I for the Autocad User Lab** ...... 1

This course is offered to complement the ENT 281 course. Students must be concurrently enrolled in ENT 281.

**NEW CLASS**

**ENT 282**

**Micro Station II for the Autocad User** ........... 2

This course utilizes MicroStation for computer-aided drafting (CAD). The course is designed for the beginning CAD user who wants to transfer existing AutoCAD knowledge to MicroStation skills.

**NEW CLASS**

**ENT 2821**

**Micro Station II for the Autocad User Lab** ....... 1

This course is offered to complement the ENT 282 course. Students must be concurrently enrolled in ENT 282.

**NEW CLASS**

**LIT 275**

**The Lord of the Rings** ............................ 5

Students will study J.R.R. Tolkien’s trilogy and Peter Jackson’s films, analyzing their literary, theological and philosophical elements. Students will be reading the novels in their entirety over the course of the quarter. Prerequisite: ENG 101 or concurrent enrollment in ENG 101.

**NEW CLASS**

**LIT 280**

**Gay and Lesbian Studies [H]** ...................... 5

An introduction to interdisciplinary field of lesbian/gay/bisexual/transgender studies from a historical and multicultural perspective. Readings from fiction, poetry, autobiography, history, essays, plays and film/television will be used to understand connections between sexual orientation and the humanities. Distribution on AA, AST, degrees.

**NEW CLASS**

**MA 111**

**Pharmacology I** ................................. 5

This class will provide a basic knowledge of the language of pharmacology, including: reading, interpreting, and documenting medication orders; systems of measurement and conversions; measuring medications for administration; calculating dosages and solutions; routes of administration; and injection techniques. Prerequisite: MTH 82 or ASSET score of MTH 83.

**NEW CLASS**

**MA 114**

**Human Body Structure, Function, and Diseases I** .......................... 4

This is the first of two structure and function classes introducing cellular function, organ systems of the body, the anatomy and physiology of the integumentary, skeletal, muscular, nervous, endocrine systems, the senses and the blood, and the common diseases and their pathology of each of these body systems. Prerequisite: AOT 147.

**NEW CLASS**

**MA 115**

**Clinical Procedures Theory I** .................... 4

This class provides a theoretical foundation in medical asepsis and infection control, vital signs, phlebotomy, the medical record, physical agents to promote tissue healing, radiology, sterilization and disinfection, minor office surgery, eye and ear assessment and procedures, the physical examination, and hematology.
MA 141  
**Career Development for Medical Assistants**  
2  
This class will cover professionalism in a medical office, successful job search, interview techniques, the importance of networking, and how to be successful on the job.

MA 211  
**Pharmacology II**  
5  
This is the second of two Pharmacology classes. This class includes the administration of medication including: safety and quality assurance, enteral, percutaneous, and parenteral routes of medication, medication for multi-system application, and medications related to body systems. Prerequisite: MTH 82 or ASSET score of MTH 83.

MA 214  
**Human Body Structure, Function, and Diseases II**  
4  
This is the second of two structure and function of the body classes and includes the circulatory system, lymphatic system and immunity, the respiratory system, the digestive system, nutrition and metabolism, the urinary system, fluid and electrolyte balance, acid-base balance, the reproductive system, and growth and development, and the common diseases and their pathology of each of these body systems. Prerequisite: AOT 147.

MA 215  
**Clinical Procedures Theory II**  
4  
This class provides a theoretical foundation for the gynecological exam and prenatal care pediatric exam, cardiopulmonary procedures, colon, procedures, introduction to the clinical laboratory, urinalysis, phlebotomy, hematology, blood chemistry and serology, medical microbiology, and office emergencies.

MA 241  
**Externship Seminar**  
1  
This course is to be taken concurrently with the externship for medical assistants. The seminar will provide current information regarding workplace issues, technologies, and advancements in health care pertinent to the externship experience. Students will be engaged in discussions based on their experiential learning opportunities within the externship.

MA 2413  
**Externship**  
6  
This class provides an opportunity to apply the theory learned in the classroom setting to a health care setting through practical, hands-on experience.

MTH 109  
**Trigonometric Tools for Vocational Applications**  
2  
The third course of a three quarter sequence designed to introduce the vocational student to the tools necessary to solve mathematical problems applicable to the student’s trade. Topics include trigonometric functions, emphasis on right angle triangles; law of sines; law of cosines; solving oblique triangles; and vectors. Prerequisite: 2.0 or better in MTH 102.

NA 100  
**Nursing Assistant**  
4  
Change credits from 10 to 4.  
This course leads to the ability of those completing the course to become Nursing Assistant Certified. The course covers communication and interpersonal skills, infection control, safety and emergency procedures, promoting resident independence, respecting resident rights, basic nursing skills, personal care skills, mental health and social services needs, care of the cognitively impaired resident, basic restorative care, resident rights, HIPAA, First Aid and CPR for the health care provider, HIV/AIDS, dementia, and cultural awareness. Students will be required to demonstrate skills associated with each of the course subjects within the laboratory or clinical setting.

NA 1001  
**Nursing Assistant Lab**  
4  
This course provides the skills laboratory and clinical requirements for the Nursing Assistant lecture course. The student will be involved in on-campus learning laboratory experiences as well as clinical rotations within community health facilities.
Basic NDT Theory in VT, PT, & MT .......................... 5
An introductory level study of non destructive testing, welding codes and standards as applied in the construction trades and maintenance repair programs. Includes discussion of NDE techniques, AWS, API inspection standards, ASME Sections V and IX codes and introduces their use. The training will follow SNT-TC-1A format for Visual Testing Level I (VT-I), Magnetic Particle Testing Level I (MT-I) and Penetrant Testing Level I (PT-I). Upon completion of this course, the student should be able to minimally identify proper welding codes, follow inspection procedures and be able perform Level I NDE for the three techniques VT, PT and MT.

Basic Ultrasound & Radiographic Testing.............. 5
An entry level course on ultrasonic and radiographic testing, techniques as applied in the construction trades and maintenance repair programs. This is a course for individuals with little or no experience in ultrasonic and radiographic testing. The course is divided into two parts, ultrasonic and radiographic testing. The course covers ultrasonic and radiographic theory, applications, inspection procedures, training standards, evaluation codes, interpretation of results and instrument operation. Includes discussion of NDE techniques, AWS, API inspection standards, ASME Sections V and IX codes and introduces their use. The class outline will generally follow SNT-TC-1A format for Ultrasonic Testing Level I (UT-I) and Radiographic Testing Level I (RT-I).

Pharmacology.................................................. 1
This class will supplement, review and reinforce information provided on pharmacology of drugs that have been covered in Nursing I, II, III, and IV. Students will review drug classifications and pharmacological principles associated with medication administration, while relating this information to a corresponding patient diagnosis as well as understanding the related nursing implications. Students will also be challenged with medication calculations throughout the course of the program. Prerequisites: current enrollment in NRS 211 and NRS 2111.

Basic Mediation Training ................................. 5
This course will include a variety of approaches and theoretical foundations for skillful dispute resolution. Students will develop communication skills appropriate for the practice of conflict management and resolution through role-play and the process of mediation. The focus will be on developing a working knowledge of basic mediation skills and understanding how conflict arises and how the resulting disputes can be identified and analyzed in the resulting conflict cycle. Successful completion of this course will fulfill the basic requirement necessary to become a certified mediator in Washington state.

Oral Interpretation ......................................... 5
Change from 3 credits to 5 credits.
Students are taught to use their voices more effectively for character interpretation and presentation. Demonstrations, class exercises, and oral reading assignments are employed.

Intro to Surgical Technology......................... 4
This class is an introduction to the knowledge and techniques essential to the surgical technician in preparation for a surgical procedure. Areas of emphasis will include expertise in preparation/utilization of equipment and supplies, sterilization and disinfection, aseptic techniques, instrumentation, surgical accessories and duties of the surgical technologist, working as a member of the surgical team.

Disease Transmission and Control ..................... 3
This class will provide the student of surgical technology an understanding of the basic concepts of microbiology as related to surgical procedures and overall patient safety, and proper application in the operating room environment as identified in the core curriculum for surgical technologists.

Ethics and Professionalism ............................. 2
This class will provide the student of surgical technology an understanding of the necessary ethical and legal background to address ethical dilemmas, participate in the functioning of organizational ethical issues and ethics committees, ethical and legal concepts, and the law as related to every aspect of the decision-making process in the health care setting, and resolving ethical conflicts and dilemmas.

Operating Room Aide................................. 3
This class will teach the essential knowledge to help the student build a sound foundation to be a part of the operating room team.

Central Service ................................. 1
This class will provide the student of surgical technology an understanding of the necessary aseptic and sterile techniques necessary to perform the essential job duties of central processing personnel.
New Class

SRGT 130
Human Anatomy for the Surgical Technician 4
This class will provide students with applicable surgical knowledge necessary to be able to relate to the patient and coworkers and use reasoned judgment in meeting the expectations of the operating room environment.

New Class

SRGT 150
Surgical Procedures I Lecture 4
This class will provide students the knowledge necessary to be able to relate to the patient and coworkers and use reasoned judgment in meeting the expectations of the operating room environment.

New Class

SRGT 160
Perioperative Patient Care 2
This class is designed to teach the peri-operative responsibilities as they relate to patient safety, and code of conduct.

New Class

SRGT 240
Surgical Seminar 3
This course is to be taken concurrently with the Operating Room Practicum II for Surgical Technologists. The seminar will provide current information regarding workplace issues, technologies, and advancements in health care pertinent to the practicum experience. Students will be engaged in discussions based on their experiential learning opportunities within the practicum.

New Class

SRGT 250
Surgical Procedures II Lecture 4
This class is a progression from SRGT 150.0, and will provide students the necessary skills, and techniques to be able to relate to the patient and coworkers and use reasoned judgment in meeting the expectations of the operating room environment. Clinical experience focuses on the advanced skills that will assist the student to transition from the classroom to employment.

New Class

SRGT 1011
Intro to Surgical Technology Lab 2
This class is an introduction to the knowledge and techniques essential to the surgical technician in preparation for a surgical procedure. Areas of emphasis will include expertise in preparation/utilization of equipment and supplies, sterilization and disinfection, aseptic techniques, instrumentation, surgical accessories and duties of the surgical technologist, working as a member of the surgical team.
New Class

SRGT 2501
Surgical Procedures II Lab ...................... 2
This class is a progression from SRGT 150.1, and will provide students the necessary knowledge to be able to relate to the patient and coworkers and use reasoned judgment in meeting the expectations of the operating room environment. Clinical experience focuses on the advanced skills that will assist the student to transition from the classroom to employment.

Credit Change

WT 1021
Intro to Shield Metal Arc Welding .............. 10
Increase credits to 10.
An introduction to mild steel arc welding, consisting of manipulative skills using the shield metal arc process with E6010 type mild steel electrode. Prerequisite: ASSET test placement with a math minimum of 32 and a reading minimum of 35 or instructor’s permission.

Credit Change

WT 1031
Advanced Shield Metal Arc Welding .......... 10
Increase credits to 10.
This course will develop welding skills to meet AWS and ASME standards using the shielded metal arc process. Prerequisite: WT 1021 or instructor’s permission.

Credit Change

WT 1041
Shield Metal Arc Welding Certification ...... 10
Increase credits to 10.
Advanced development of arc welding skills to meet AWS, WABO and ASME certification standards using the shielded metal arc process. Prerequisite: WT 1031 or instructor’s permission.

Credit Change

WT 2011
Intro to Pipe Welding ......................... 10
Increase credits to 10.
An introduction to Pipe Welding using mild steel pipe and the shield metal arc process with E6010 covered electrode. Develop the necessary welding skills and techniques to prepare for certificate in accordance with ASME code. Prerequisite: WT 1041, 1051, or instructor’s permission.

Credit Change

WT 2031
Pipe Welding Certification ................... 10
Increase credits to 10.
This course is designed for the welding of plate and pipe using the GAS Tungsten Arc Welding (GTAW) process. Instruction will stress developing proper manipulative techniques and skills necessary to certify using the GTAW process. Prerequisite: WT 2011 or instructor’s permission.

Non Discrimination Statement

Columbia Basin College complies with the spirit and letter of state and federal laws, regulations and executive orders pertaining to civil rights, equal opportunity and affirmative action. CBC does not discriminate on the basis of gender, race, national origin, religion, age marital status, physical, mental or sensory disability, sexual orientation or Vietnam veteran status in its educational programs or employment. Questions may be referred to Camilla Glatt, Affirmative Action Officer, (509) 547-0511, ext. 2348.

Disability Statement

Individuals with disabilities are encouraged to participate in all college sponsored events and programs. If you have a disability and require an accommodation, please contact the CBC Resource Center, (509) 547-0511, ext. 2252, or TTY/TDD at (509) 546-0400. This notice is available in alternative media by request.

Limitation of Liability

The College's total liability for claims arising from a contractual relationship with the student in any way related to classes or programs shall be limited to the tuition and expenses paid by the student to the College for those classes or programs. In no event shall the College be liable for any special, indirect, incidental, or consequential damages, including but not limited to, loss of earnings or profits.
